HOSPITAL CATALOG

FZBMS Hospital Module Catalog

A focused overview of completed hospital and patient-care administration workflows.

For hospital administrators, reception, clinicians, billing staff, and authorized records users.

FZBMS contacts: contact@fzbms.org (sales and demos) | support@fzbms.org (technical, account, and billing support) | info@fzbms.org (general information and partnerships) | fzbms.org

Scope: This guide documents the implemented FZBMS workflows represented in the supplied source snapshot. What a user can see and do depends on the organization type, subscription plan, branch assignment, role permissions, and enabled modules.

Hospital module map

The hospital portal supports patient identity and journey records, appointments, doctors, consultations, operational workflows, billing, reports, and print views. Available actions depend on configuration and user role.

Area	Purpose
Patient records	Register, search, and review patient record and visit history.
Appointments	Create and manage appointment details and status.
Doctors	Maintain doctor records and supported schedule details.
Consultations	Record consultation activity against the correct patient and clinician.
Operations	Track configured operational and patient journey events.
Billing	Prepare bills, record payments/status, and review outstanding amount.
Reports and print	Review operations and produce patient journey or operations print views.

Roles and safe workflow

Role	Typical responsibilities
Reception	Patient search/registration and appointment management.
Clinician	Assigned consultation records.
Hospital administrator	Doctors, setup, operations, and oversight.
Billing staff	Charges, payments, and balances.
Supervisor	Reports and operational review.

Recommended sequence

- Configure hospital identity, services/departments, doctors, and user access.
- Find or register the patient before starting a new visit.
- Record appointments, consultations, and operational events against that patient.
- Create and reconcile billing and payment records.
- Review patient journey and print only for authorized recipients.

> This catalog describes software workflows. It does not replace clinical protocols, professional judgment, privacy requirements, or records policies.
